SELF-DESIGN KITE MAKING WORKSHOPS INTRODUCTION

Kite flying is a fun hobby with a long history. It can be a great way to relax and be with nature. Flying a store bought kite may be convenient, but it is very different from flying one that is built with your own hands! At Layangman's Kite Making Workshops, one will learn about the basics of kite flying, its aerodynamics and how to build a kite. Participants will build and decorate their kites that are guaranteed to fly (even indoors in virtually zero wind or in extremely light wind)! This workshop will be a great way to promote team-bonding and family bonding!

RUBBER BAND GUN MAKING WORKSHOPS INTRODUCTION

What can be better than making your own toys and feeling a sense of achievement and satisfaction? Rubber band guns are actually pieces of engineering wonders, from simple trigger and release mechanisms to complex escapement traps. From single shots to semi-auto to fully auto machine, guns can be made from just scraps of wood, with rubber bands as projectiles.

In this workshop, Rubber Band Semi-auto Gun kits with ready-made parts are available, where anyone can learn the engineering behind each moving part to understand how things work. You can have fun assembling your own gun and understand the physics of stored energy in a stretched rubber band at the same time!
